About

In 15 years teaching I learnt how to simplify paths for people to get to their goals, worked with a huge range of people and was a key part of a team driving to the same goals. From writing I have learnt creative collaboration, iteration and performing to the highest professional standards.

For me UX represents the perfect mix of my problem-solving and creative skills, as well as allowing me to utilise the people skills I developed whilst working in education.

User Experience

UX Designer

Imperial College NHS Healthcare Trust, London

Nov - Dec 2022

Worked with Dr Dimitri Amiras on the user experience of an AR app designed to help radiology students. Completed user interviews, surveys and competitive analysis. I then analysed results, wireframed (mid and high fidelity) and usability tested the results, before presenting my findings and proposals to the stakeholders.

Iterative Design

Teaching

Teacher

Old Palace Primary School

September 2009 - July 2021

In 15 years at the school I worked in a number of positions, planning and teaching sessions to small groups and full classes, monitoring and adapting to children's progress, interacting with staff and parents and managing my own timetable. I thrived in an Ofsted Outstanding rated organisation and continually worked to and met deadlines in a high pace, high pressure environment. I worked as part of many teams and was promoted a number of times during my time there.
